THIS CALENDAR YEAR IS MORE THAN THREE QUARTERS GONE AS YOU receive this Catalogue No. 55, which is only our second regular price list of 1980. Additionally, we issued one Sierra Coins list along with our rather impressive May auction catalogue. During the period 1972-1979, our clients became accustomed to ten or more price lists each year. Some ask about the sudden change.

Several factors have created this anomaly. The most influential single event was that Marney Albert and I were married in July after a seven year relationship. Marney and I met when she interviewed to be the first California secretary of Cordry & Craig, International, in August 1973. She has been a significant part of my company ever since she prepared "Viking Coins" list #6. How many of you can recall its issuance in 1974?

A second influence is that the coin market has been quite peculiar this year. Inflation levels above 10% per annum seem to draw investors and speculators to the antique market, including its numismatic segment. Concurrently, established collectors, a generally affluent group, seem to become investment conscious and often expend some investment funds, as well as their "hobby money", on coins. And finally it appears to me that many individuals who have become tired of collecting coins, and who would normally sell their coins back into the market, instead simply "put them away" as an investment already afforded which can be cashed out for even more when a "rainy day" comes.

The net result seems to be that the marketplace loses three neat coins for every one that enters it. The constant runoff into strong financial portfolios can only continue for a while before prices of the remaining high quality items increase noticeably.

Those significant, but palatable, increases began in earnest about 1968 and continued in a rather steady linear manner until as recently as May of the current year. By then the U.S. coin market had finally burst under the pressure of artificially stimulated 5% - 10% per month price increases. Around the same time the gold and silver bullion markets steadied somewhat and thereby stopped generating inordinately easy and high profits for many brokers (who doubled as coin dealers). A significant number of these quasi-numismatists ended up holding piles of money and were looking for a new game to play. Medals, tokens, paper currency or even old baseball cards were all possibilities for their new exploits - but unfortunately "foreign coins" were chosen. The lemmings are still entering the market daily spending huge amounts of paper dollars on anything that "shines" and/or "looks cheap". And after witnessing UNC Barber half dollars changing hands at nearly \$10,000 each, everything in foreign looks cheap!

This herd of nouveau riche are intrepid and a powerful influence. As long as they "play the foreign market", it will not even resemble the orderly patterns which we became accustomed to from 1963 through 1978. You cannot control, nor redirect, nor stop them. The wisest reaction is to adjust to their presence. As a lot, foreign coin collectors are probably too intractable to fulfill the role that these manipulators would prefer to assign them. But what can you do until such time as they decide to leave us alone again? In my next list, I will offer a few feeble suggestions.

MAY 1981 AUCTION CONSIGNMENTS NEEDED

Our May 1981 auction sale is already being tentatively arranged. Whereas we neither solicited nor accepted consignments for the 1979 or 1980 auction sales, we are hoping to obtain about 200 lots of generally exceptional material via consignment for the 1981 counterpart. If you have some nice pieces available, which are worth at least \$100 each and which average a minimum of \$300 each, consider consigning them (or selling outright) to us. Our consignment fees are innovative and flexible. We currently need at least \$100,000 value in additional material for our May 1981 auction.

TERMS OF SALE: Coins are available on approval to established clients with a good payment record. New customers are asked to pay on invoice or to supply adequate financial references with their order. All coins are guaranteed genuine and as described. We offer a two-week unconditional return period. All payments are due within ten (10) days unless other arrangements have previously been made.

POSTAGE AND INSURANCE: We will pay postage and insurance on all domestic U.S. orders received with payment or by telephone. Others will be billed for postage and insurance. Overseas buyers will be billed for postage and a \$3.10 registration fee, plus 2% for insurance except: (1) On telephone or telegraph orders we will pay the postage and registration but not the 2% insurance, and (2) Overseas buyers are welcome to save the 2% insurance fee by insuring the parcel themselves and notifying us in advance.

PHONE ORDERS: We are open most weekdays 1 PM through 7 PM Pacific time. Our answering service will receive phone calls 24 hours a day whenever we are not in the office. Leave your name and the list numbers wanted; we will contact you in case of confusion. When personally available, Freeman or Marney (but not the answering service) can be telephoned at 415-332-1828.

VENEZUELA We are still quietly dominating the North American and European markets in obtaining coins of this country. Currently our 40 or so clients in Caracas and Maracaibo are demanding higher quality pieces; our buying prices for such items are the strongest in the world outside the home market. The items listed below are offered only to attract new collectors; consequently, prices of items #202-228 are available upon request only to serious collectors. Dealers are welcome to tender offers which will be accepted or rejected without comment; conversely, dealers offering us pieces are welcome to submit them for our immediate cash offer.

COINAGE OF POTOSI - 1617 THROUGH 1825

WE HAVE BEEN COMMISSIONED TO PRESENT AND DISPERSE THE FOLLOWING GROUP OF COINS all emanating from the prolific silver refinery and minting facility in the "Alto Plano" called Potosi. The famous mountain of silver (Cerro de Potosi) has been the single largest source of silver ever discovered. The earliest coinage was struck about 1575, of cob type, primarily to export specific quantities of silver back to Spain. Cobs were made until more modern machinery arrived in 1767. Even then it took six years of transition before all the coinage was machine struck! Bust issues, of slightly lower grade silver, began that year and continued until 1825 when Simon Bolivar drove the final 4000 Spanish troops from the area. Those 250 years of coinage covered numerous major types and varieties which together express much history and can form the basis of a fascinating coin collection.

Most reference book numbers have been omitted since they seem superfluous in a special offering such as this. Grades on the cobs indicate overall appearance and desirability, not degree of wear. Orders for ten or more pieces will receive a discount of at least 5%. Prices are good through the rest of 1980.

COB 8 REALES DATED 1617-1773

303	E51 1808 PJ	EF+, lustrous, some minor crudeness	125.00
304	E51 1808 PJ	Typical VF	45.00
*305	E52 1808 PJ	Ferdinand VII issue probably struck in 1812. Lustrous EF-AU, very bold reverse. Comparable to a piece offered by a major U. S. coin dealer at the Cincinnati 1980 ANA convention for \$800.00	275.00
306	E53 1809 PJ	scarcer date, also struck about 1812. VF+.	80.00
307	E53 1809 PJ	EF-AU, much luster and well-struck, minor flan flaws	175.00
308	E57 1813 PJ	VF+, luster, the reverse is really EF.	75.00
309	E64 1819 PJ	EF-A.UNC with much luster	165.00
310	E65 1820 PJ	EF-A.UNC with much luster	165.00
311	E68 1823 PJ	EF, hairline scratches dull the natural luster.	70.00
312	E69 1824 PJ	EF-A.UNC, obverse is quite lustrous.	140.00
*313	E70 1824J	RARE assayer. Very Fine, expertly plugged at 1 o'clock.	225.00
314	E70 1824J	another example (our first ones in two years.) VF-EF for wear but many small nicks, scratches and corrosion evidence.	300.00
315	E71 1825J	very scarce assayer. AVF, ornate initial M lightly scratched in the field in the front of the bust. Not unattractive	175.00
*316	E71 1825J	another example of this very scarce assayer but in cleaned Very Fine.	265.00
317	E72 1825JL	final colonial issue in Potosi. Lustrous and well-struck EF+	100.00

POTOSI struck coinage for the Republic of the PROVINCIAS DEL RIO DE LA PLATA.

These are commonly assigned to Argentina due to their similarity with the later Rioja mint 8 Reales 1826-1837. However, a good argument can be made for this being the first "Bolivian" Republic crowns (even though Bolivia was so named thirteen years later).

*318	Potosi mint 8 Reales 1813J (Argentina E1, C15)	narrow date. VF, nice surface	175.00
319	--similar 1813J	but wider date and decent VF+	200.00
320	-8 Reales 1815 F (Argentina E5, C15).	Very Fine	175.00
321	-8 Soles 1815 FL (Argentina E7, C20),	variety with "S" (for Soles) recut over an "R" (for Reales). Very Fine, nice surface.	250.00
322	- $\frac{1}{2}$ Real 1815 F (Argentina C11).	Very Fine	65.00

This consignment includes approximately one hundred minor coins, #322 above and all the coins listed on page 19. The pieces of low average quality are priced to sell. The exceptional coins are not cheap but are priced conservatively per the current market trend.

THE COINAGE OF PERU by Grunthal and Sellschopp. This 300-page hardbound reference book covers all Lima and Potosi colonial coinage together with republican Peru. Following a 15-page historical introduction, every coin issued (in all metals) by these mints is listed with one or more pedigrees. It is the best effort yet in identifying which coins and major varieties exist. Five hundred copies of this book were printed at a cost of \$20 each. We bought 10% of the "mintage" and offer them at our cost of \$25.00 plus postage.
